# Routing in Single Page Apps

# Routing in Single Page Apps

## App.js (React / React Router)

```
function App() {  
  return (  
    <BrowserRouter>  
      <Header />  
      <div>  
        <Routes>  
          <Route path="/" element={<Home />} />  
          <Route path="/products" element={<ProductListing />} />  
        </Routes>  
      </div>  
    </BrowserRouter>  
  );  
}
```

# Summary

**Convention-based routing with /pages**

**Creating non-routed components**

**Using layouts**

**Linking to routed pages**

**Creating dynamic routes**
